Region 9
Environmental Protection Agency
Week of 2/27/2017
Land Division

Highlight of Past Week

Significant Items for Next Week

Internal to Region 9

State/Federal Pesticides and Water Quality Coordination: On February 28, we facilitated a discussion of opportunities for cooperation and information sharing among EPA Office of Water, Office of Pesticide Programs (OPP), and Region 9 Water and Land Divisions with California State and Regional Water Quality Control Boards, and Department of Pesticide Regulation. California water regulators estimate that their updated CWA 303(d) list will include at least 142 waterbodies impaired due to pesticides, with about 1/3 from pyrethroid insecticides. The call was intended to help state water regulators understand EPA pesticide registration review processes so that these agencies can provide comments, information, and data in support of mitigations that OPP might consider to protect water quality.
